07/25/1.2.3 MHRA - Drug Safety Update & NHS England Patient Safety alerts					
	07/25/1.2.3	MHRA - Drug Safety Update & NHS Er	ngland Patient Safety alerts		

	The Safety report that was discussed at the July 2025 IMOC meeting was received.  Ewa Gabzdyl informed the group of the items included in the safety report.	
	MHRA- GLP-1 medicines for weight loss and diabetes: what you need to know Action:	
	The committee discussed that there are a lot of interactions to GLP-1 medicines not only for weight loss but also for diabetic patients, and where best to publish this information. It was agreed that the link GLP-1 medicines for weight loss and diabetes: what you need to know - GOV.UK should be added to the MPD, included in the next target meeting, Optimise RX and in the monthly bulletin. Rachel Hubbard will prepare some wording to for the bulletin.	KJ &RH
	Senokot (sennoside or senna fruit extract, senna pods) products Action:  • The committee agreed that there should be Optimise Rx messages to prompt prescribers that use in pregnancy and lactation is now contraindicated.	JC
07/25/1.2.4	IMOC Update Ashley Hill updated the group on the progress of the following documents that will be put on website / MPD when finalised.  ➤ Tirzepatide type 2 diabetes guidance - Update on current guidance  ➤ Tirzepatide for weight management FAQ for primary care Clinicians-already on MPD  ➤ Lipid modification in younger adults with T2DM − To be added to MPD when get uploaded  ➤ Acarizax and Grazax SCP - Update current SCP to be uploaded to IMOC website /MPD  ➤ SMR/ Polypharmacy documents to be uploaded to IMOC website /MPD	
07/25/1.3	Matters Arising	
04/25/1.4.1	Valproate Review process The SY ICB Valproate Guidance in Primary Care document is available on the IMOC website, but the group decided that more discussion could be had around the use of these documents to support prescribers in Doncaster.	
	Mallicka Chakrabarty discussed anti-epileptic and migraine medication which could influence foetal animalities and the direction from the faculty of sexual health on which contraception should be used particularly with Topiramate. Topiramate has enzyme-inducing activity and the recommended contraceptive options are Cu-IUD, LNG-IUD or DMPA plus condoms. This should be highlighted as patients take Topiramate for migraines and should be sighted on the implications if contraception is not used particularly on young patients. Mallicka shared a link: Message from	

	the CEU: Medication safety updates on Topiramate and DMPA   FSRH which was agreed by the committee that the link should be hosted on the MPD under Topiramate.	
	Action:  • Karen Jennison to update the MPD with the following under Topiramate.:  Message from the CEU: Medication safety updates on Topiramate and DMPA   FSRH	KJ
06/25/1.5.3	Thyroid register	
	Rob Wise gave an update that Bassetlaw GPs were supportive of the guidance clinically, but it did bring up question regarding the closure of the thyroid register, and the impact it will have on primary care. They have discussed their concerns with Dr Muniyappa who is organising a separate meeting with Bassetlaw GPs. The chair explained that the thyroid register is not closing as there are a lot of complex patients, only simple hypothyroid patients are being discharged into Primary Care at this time, and there will be patients who require follow up and a shared care approach and these patients will stay under secondary care. The chair was happy to attend the meeting with Bassetlaw GPs and Dr Muniyappa if available, to give support and facilitate the conversation. There are contractual and commissioning issues still to be confirmed before the process can be rolled out, and the committee will be updated in due course.	
07/25/1.4	New Business	
07/25/1.4.1	Nocturnal enuresis/bed wetting in children The guidance document has been included in the MO bulletin, and desmopressin melt for bed wetting is already on the MPD traffic lighted as green. For completeness the guidance document has come to PMOC for information. The committee were happy to agree the traffic light status and guidance.	
07/25/1.4.2	Signature of proforma for SCP / Internal governance.	
	Sonia Griffiths asked the committee for clarification whether it must be a GP who signs the shared care proformas. With the developing primary care workforce other clinicians such as Practice pharmacists who feel competent to do so could sign the proformas. Ewa Gabzdyl informed the group that this has been discussed at the recent IMOC subgroup. It was confirmed that currently the proformas do state that a GP signature is required, but as the process is going through some change this will be reviewed. The subgroup discussed that it is dependent on the individual practice internal processes whether other clinicians can sign on behalf of the GP. Ashley Hill informed the group that there is a task and finish group who are developing a process for the use of electronic proforma templates. This has been agreed at IMOC and is currently at being piloted at an	

		T
	outpatient department at DRI, with a view to being rolled out throughout SY. Further information will be brought back to PMOC at future meetings.	
07/25/1.4.3	Changes in website arrangements	
	Ashley Hill gave the committee an update that the Doncaster MO website will not be updated with new documents or any additions from today, and at some point, will be decommissioned by RDaSH and will disappear altogether.	
	The MPD will continue to be updated as normal.	
	Because some of the documents are housed on the website and linked to the MPD once the website is removed from service the links will go down on the MPD, and links will be updated with the new website when this goes live.	
	The website action group is in the process of developing the SY ICB MO website, looking at formatting, re-naming documents and archiving old documents.	
	It is hoped that the new SY ICB MO website will be going live on the 1st of September 2025.	
07/25/1.5	Any Other Business	
07/25/1.5.1	Pre-emptive prescribing Guidance review Lee Wilson has been working with colleagues to update the current pre- emptive prescribing guidelines. The group reviewed the draft version which was circulated for comment. The document will also be taken to RDaSH FT medicines management committee and DRI drug and therapeutic committee. It was noted that the palliative care formulary link does not work, and logos were on some of the pages but missed off the title page. It was suggested that the referral forms could be digital, and the question was raised whether the documents could be embedded in the Ardens template folder on the clinical systems. Steve Davies informed the group that he is currently looking into electronic prescribing. The committee agreed that any further comments could be sent to Lee Wilson before the next PMOC meeting and will liaise with Karen Jennison regarding logos and will update the link to the palliative care formulary.	
	Action:  • Lee Wilson to update link to palliative care formulary  • Karen Jennison to put logos on the final document  • Committee members to send any further comments to Lee Wilson  • Final documents to return to Augusts PMOC for approval	LW KJ ALL KJ/LW

			GPs can prescribe. Green	
			traffic light status.	
	4.8.1- Levetiracetam injection			
	The committee discussed this item in detail, on the MPD Levetiracetam			
	injection is red hospital only drug. Currently there is a palliative care patient			
	registered at a Worksop Practice who requires a prescription for			
	Levetiracetam for a syringe driver. The practice will not prescribe as it is			
	traffic lighted Red, the hospital consultant switched the patient from oral			
	Levetiracetam to IV as it was better suited for the patient, the patient was			
	discharged with a supply. The patient's supply has now run out. Lee Wilson			
	asked the committee whether the traffic light status of Levetiracetam injection could be switched to Amber as previously on the old formulary,			
		•	•	
I DUIT DE TE	ie uki iomiliary nas now	, been Hansteffe	d to the MPD the traffic	

	light status could have been changed by mistake. It was noted that the injectable dose is the same as the oral dose and that it is off label using it as subcutaneous injection. The committee also discussed that it is the decision of the prescriber whether they are happy to prescribe Levetiracetam injection as the MPD is used as a guide. There was some nervousness from changing traffic light status as it is not a familiar formulation to primary care prescribers and an information guide would be useful. The committee discussed due to the current process that a change in traffic light status should mean that an IMOC application form should be completed and discussed at IMOC to make the final decision.  Action:  • Karen Jennison to make the agreed amendments to the MPD  • Lee Wilson to complete IMOC application form including prescribing information and send to Ashley Hill  Post meeting note: Ralvo is now discontinued and should not be added to the MPD	KJ LW
