

Type 2 Diabetes meter review

In June 2025, NHS updated the guidance for patients using blood glucose meters and test strips, a national assessment was undertaken to better understand the products available and how they meet the needs of all people living with diabetes.

The new guidance will ensure that people living with diabetes have continued access to clinically effective meters and test strips.

You are invited to come along to a Diabetes meter swap shop where you can choose a new free blood glucose meter that is most suitable for you:

**Tuesday 24th March 2026
Between 2:30pm – 5:30pm at
Anston Medical Centre, North Anston, 15 Quarry Lane,
S25 4DB.**

There will be an opportunity for you to talk to health care professionals about your diabetes and how we can help support you to manage your condition effectively.

If you cannot attend this session, we will arrange for an alternative meter to be available for you.

Yours Faithfully,

Dinnington Group Practice & NHS South Yorkshire.

Medicines Optimisation Team
